Description

The KP Performance KP-14DPG-2 is a high performance LTE / CBRS Mesh Parabolic Dish antenna specifically designed for cellular networks. KP Performance's KP-14DPG-2 has 20 to 22 dBi gain and can be used to broadcast Cellular LTE signals. The KP-14DPG-2 operates from 1710 to 4200 MHz which is ideal for 5G, LTE, PCS, UMTS, CBRS applications including LoRA, LTE-M, and NB-IOT. The Multi-Band design of the KP Performance KP-14DPG-2 antenna eliminates the need to purchase different antennas for each frequency. This simplifies installations since the same antenna can be used for a wide array of telecommunication applications where wide coverage is desired.

The KP-14DPG-2 from KP Performance has directional patterns with Dual Slant ($\pm 45^\circ$) polarization and features 2 x Type N Female connectors. The Type N connectorized KP-14DPG-2 antenna from KP Performance is designed specifically for outdoor operation and is ideal for point to point use in large open areas such as base station installations or cellular backhaul. The included mounting bracket and hardware makes this antenna very easy to install. This LTE / CBRS Mesh Parabolic Dish antenna just like our wide selection of superior quality RF parts, ship same day.
